Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 1-11, 21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group I, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on 3/25/05.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Artner et al (US Patent No 6141935).

Artner discloses a method of forming a vehicle panel (column 1, lines 13-15) comprising: providing a unitary panel having a first portion formed as an outer portion (1), and a second portion formed as an inner portion (2a-b, 3); and bending the panel to form a crease between first and second portions (area identified as 4 in Figure 1).

Claims 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Pruitt et al (US Patent No 5890285).

Regarding claim 12, Pruitt discloses a method of forming a vehicle body panel (Abstract lines 19-23) comprising: providing a unitary panel having a first outer portion (12 in Figure 2),

Art Unit: 3726

and a second inner portion (14 in Figure 2); and bending (18) the panel to form a crease between the two portions.

Regarding claim 13, Pruitt discloses subjecting the metal sheet to fluid pressure to form the unitary panel (column 5, lines 50+).

Regarding claims 14-15, Pruitt discloses a periphery (16) having a first segment (at the trailing edge or rightmost indication of 16 in Figure 3) on the outer portion (12), and a second segment (at the trailing edge or rightmost indication of 16 in Figure 3) of the periphery on the inner portion (14); wherein bending the panel is such that a portion of the first segment continuously abuts/joins a portion of the second segment (Figures 9-12 illustrate the inner & outer portions are joined at the trailing edge or rightmost position of the panel).

Allowable Subject Matter

Claims 16-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record on the attached PTO-892, and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3726
